Human Factors Recurrent Course

Information Brochure

Human Factors training has proven to be an effective countermeasure against human error in the workplace. The Aviation Consulting Group's Aviation Human Factors Initial course creates an in-depth understanding and awareness of the factors that contribute to human error; errors that lead to accidents and incidents that cost billions of dollars' worth of damage and loss of life each year. Most, if not all, of these accidents are preventable! Human Factors training is a highly cost-effective tool that can help minimize human error and reduce accidents and incidents in the workplace.

TACG is a worldwide leading provider of aviation Human Factors training. We have been providing Human Factors training to aviation operators on a worldwide basis since 2000. Our Aviation Human Factors course is cost-effective, flexible, and practical (*we minimize theory and maximize real-world experiences, examples, and case studies*).

When it comes to Human Factors training...a soft skills subject...the most effective delivery method is face-to-face with a live facilitator. Our highly experienced facilitators present timely, research-based topics, guide discussions, and interject lots of anecdote (as well as some humor). A face-to-face class allows greater interaction between attendees through personal experiences, group exercises, activities, and case studies. Additionally, a live facilitator will be able to answer your questions in real-time!
